5 units per case (shipping not included)

Suggested Retail Price: \$39.95

"We've all been there. You're driving down the road, you turn the corner and you hear your clubs slide in the back of your car and slam into the side. Those days are over. The Golf Cradle was made specifically for golfers who "Take pride in their golf clubs." All you do is lay the Cradle in the back of your car. The Golf Cradle keeps the heads elevated off the floor which reduces head and shaft damage. Once the bag is placed into the Golf Cradle, the arms automatically close, grasping the bag. A strap with a buckle secures the clubs in place. The Golf Cradle stores easily in your truck, and if you leave your clubs in the truck, it's the best way to keep them protected."

Golf Journeys, November 2007

"The Golf Cradle is easily one of the two or three best golf accessories I've ever seen....and it works perfectly. The Golf Cradle is a great product, and given the number of people with clubs banging about in their trunks, the company should sell millions of them."

The Golf Blogger, May 2008

"The Golf Cradle is a great way to look after your clubs while transporting them in your car. It is simple but effective."

Buzzin Golf, May 2008
